

COMPANY PROFILE

Company profile 2026

Structural and architectural steelwork for developers, architects, contractors and factory owners. Design support, fabrication, protective coating and erection under one contract.

20

years in Shah Alam

350+

projects delivered

4,800 t

fabricated a year

12,000 m²

covered yard

Who we are

Teguh Fabrication is a structural and architectural steel contractor founded in 2006. From a covered 12,000 m2 yard in Seksyen 15, Shah Alam, we detail, fabricate, blast, coat and erect steelwork for factories, warehouses, offices, schools, hospitals and homes across Peninsular Malaysia.

Teguh means firm and steadfast in Malay. It is how we want our steel to stand and how we want clients to find us: drawings checked before fabrication starts, welds inspected and signed, programmes we keep.

In numbers

Measure	Figure (sample)
Years in operation	20 (founded 2006)
Projects delivered	350+
Fabrication capacity	4,800 tonnes a year
Covered workshop and yard	12,000 m2
Overhead cranes	4 cranes, up to 20 tonnes
In-house team	86 staff, 3 erection crews

Leadership

Name	Role
Ir. Hafiz Othman	Managing Director, Professional Engineer (sample credential)
Lim Wei Siang	Director, Fabrication and Yard
Nurul Ain Kamal	Head of Design and Drafting
Ravi Chandran	QA/QC Manager, certified welding inspector (sample)
Tan Mei Ling	Commercial Manager
Azman Yusof	Erection and Site Safety Manager

What we do

01 Structural steelwork

Portal-frame factories and warehouses, multi-storey frames, transfer structures, pipe racks and platforms.

02 Staircases and balustrades

Feature stairs, escape stairs, cat ladders, handrails, glass and bar balustrades.

03 Gates and fencing

Sliding and swing gates prepared for automation, perimeter and anti-climb fencing, guardhouses.

04 Canopies and awnings

Drop-off canopies, covered walkways, car park shades and station forecourts.

05 Mezzanine floors

Warehouse, retail and plant-room mezzanines with stairs, gates and edge protection.

06 Architectural metalwork

Facade screens, fins, perforated cladding, louvres and feature ceilings.

How a job runs

- Drawings review and quotation, usually within five working days.
- Shop drawings and connection details for your engineer's approval.
- Fabrication, inspection and protective coating in our Shah Alam yard.
- Delivery and erection by our own crews, with a QA dossier at handover.

Selected projects

Project	Location	Year	Steel
Port Klang Distribution Hub	Port Klang, Selangor	2026	1,240 t
Bukit Jalil Office Atrium Stair	Kuala Lumpur	2026	38 t
Senai Electronics Plant Mezzanine	Senai, Johor	2025	210 t
Seremban Hospital Covered Walkway	Seremban, Negeri Sembilan	2025	96 t
Damansara Office Facade Screen	Petaling Jaya, Selangor	2025	64 t

Clients and project names in this sample document are fictional. A live profile lists real references with the client's permission.

Yard and equipment

Equipment	Capacity
CNC beam drill and saw line	Sections up to 1,000 mm deep, 18 m long
CNC plasma and oxy-fuel table	Plate up to 50 mm, 3 x 12 m bed
Shot-blast room	Members up to 15 m, Sa 2.5 finish
Paint shop	Airless spray, controlled humidity
Overhead cranes	4 cranes, 5 to 20 tonnes
Welding sets	36 MIG/FCAW and SMAW sets
Mobile cranes (own fleet)	25 t, 50 t and 80 t
Lorries	3 x 10 t flatbeds, 1 x 40 ft trailer

Software and drawings

- 3D detailing models with connection design support for the project engineer.
- Shop drawings, erection drawings and bolt lists issued for approval before cutting.
- Model exports (IFC) for coordination with architects and M&E consultants.

Quality, safety and registrations

Item	Status in this sample
CIDB registration	Grade G7 (sample, shown for this demo)
ISO 9001:2015	Quality management system (sample)
ISO 45001:2018	Occupational health and safety (sample)
Welding procedures	Qualified procedures and certified welders (sample)

A live company profile states the actual registrations, certificate numbers and expiry dates. This demo invents none of them.
